Overview

Overview

Founded in 2018 by a team of innovative IT professionals and computer engineers, Pandora Networks EA Limited is a premier technology company. Registered under No. 80020001211631, Pandora Networks specializes in software development, IT services, and project management, with a strong commitment to client-centered service.

Focused on large-scale IT projects and preventive maintenance of IT infrastructure, Pandora Networks strives to make a positive impact across various sectors—including education, healthcare, consumer lifestyle, and business—by delivering cutting-edge, practical technology solutions.

Pandora Smart Digital Sub Metering

A complete smart electricity sub-metering solution designed for apartments, hostels, commercial buildings, and rental properties. Tenants can conveniently purchase electricity tokens via the USSD code *217*574# or by downloading our mobile app through our website www.pandorameters.com, enabling fast and easy recharges from anywhere. The system provides independent power control, automatically disconnecting only the tenant whose electricity balance is exhausted while keeping all other units connected. Each meter is equipped with advanced anti-tamper protection, detecting and preventing unauthorized interference to ensure accurate billing, revenue protection, and reliable energy management.

**Integrity:**

Upholding honesty and strong moral principles in all interactions.

**Professionalism:**

Maintaining excellence and high standards in all services.

**Satisfaction:**

Focusing on client needs, feedback, and expectations.

**Ethical principles:**

Adhering to business ethics and promoting responsible technology use.

OUR CORE VALUES

Vision

To be the leading IT service provider in East Africa, specializing in software development, preventive maintenance, and comprehensive IT project management. We are committed to a hands-on, customer-oriented approach that fosters lasting partnerships with our clients.

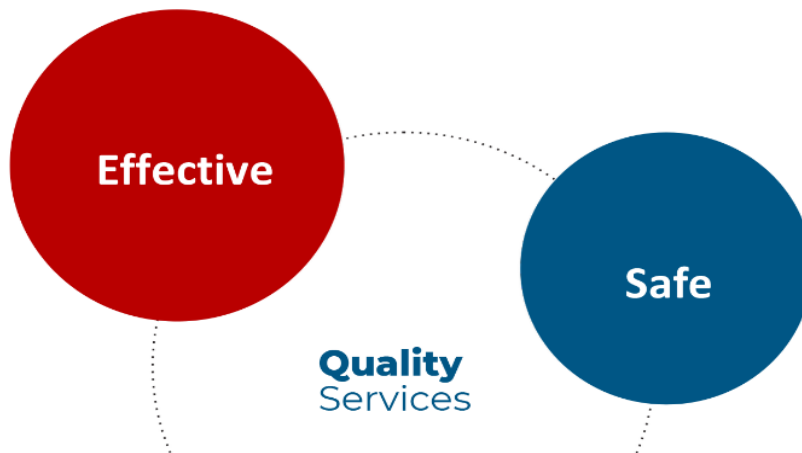

Evans
Twineamatsiko

► About Our **PMO**

Our projects are led by Evans Twineamatsiko, an accomplished Electrical Engineer, Data Center, Telecommunications, and Infrastructure Project Manager with extensive experience in electrical systems, Smart Digital Sub Metering, power infrastructure, telecommunications networks, and technology project implementation.

Evans holds a Bachelor's Degree in Electrical Engineering from Makerere University, a Project Management Professional (PMP®) certification, and a Master of Business Administration (MBA) from Maharishi International University in the United States of America. He is also OSHA 30 Certified and CPR Certified, demonstrating a strong commitment to safety, quality, and regulatory compliance.

He has successfully supervised and managed complex infrastructure projects in the Washington, D.C. USA, and Baltimore metropolitan areas, leading multidisciplinary teams and delivering projects across electrical, telecommunications, and data center environments.

Some of our products and **Services**

We have a number of cutting edge solutions that are helping to transform society. These include;
